Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following office action is in response to the communication filed on January 4th 2006. Applicant has amended claim 1. Applicant has cancelled claims 7 and 9. Claims 5, 6 and 8 were previously withdrawn from consideration. Claims 1 – 4 are pending based on this application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 3 are rejected under 35 U.S.C. 102(b) as being anticipated by the U.S. Patent No. 4,787,603 to Norton.

In regard to claim 1, Norton discloses an energy-absorbing barrier system comprising an infill area (Fig. 2) spanned by interconnected vertical metal pipes (54, 55) and horizontal metal pipes (50, 53) where some portion of the vertical pipes is buried below ground surface (Figs. 2, 4); and an infill material (column 2, lines 5-7) secured to horizontal or vertical pipes by tethers (column 2, lines 5-10).

In regard to claim 2, Norton discloses one or more of the pipes are filled with cement (column 5, lines 37-39). A pipe inherently fills with cement (concrete) upon its insertion in cement.

In regard to claim 3, Norton discloses pipes are steel (column 5, lines 14-15).

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over the U.S. Patent No. 4,787,603 to Norton in view of the U.S. Publication No. 2003/0178614 to Venegas Jr.

In regard to claim 4, while Norton discloses an energy absorbing barrier system comprising metal pipes, he does not disclose metal pipes covered with plastic.

However, Venegas teaches metal pipes covered with plastic (Figs. 1; page 1: paragraph 0007; page 5: paragraph 0057).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Norton by using pipes covered with plastic cover over one or more of the pipes for corrosion prevention in order for metal pipes to have a longer life.

Remarks/ Arguments

Applicant's arguments are moot under this new rejection.
